Cloud Contact

Cloud Contact App Where User Can Register, Login and then keep and manage their contacts in the cloud. In this project I will use:-

1. Node Js,
2. Express,
3. Mongo dB for Serving API and
4. React With Redux for Frontend.

It Will Consist of: -

- Dependencies for server
- Dependencies for client
- Run the client & server with concurrently
- Run the Express server only
- Run the React client only
